PCR-based studies on the dissemination of Coxiella burnetii in the white-tailed deer: II. Phylogeny of the variable small ribosomal RNA gene region. A survey of white-tailed deer in Maryland, U.S.A. was performed to determine the distribution of Coxiella burnetii in this important reservoir host. Blood, faeces and tissue samples were collected from all deer, and examined for the presence of C. burnetii using a nested polymerase chain reaction (PCR) to amplified a 946-bp variable region of the small ribosomal RNA (rRNA) gene. A search of the literature revealed that this was the longest variable region of the C. burnetii rRNA gene previously used in phylogenetic studies. DNA sequence data were generated for a portion of this 946-bp region to determine whether it could distinguish between C. burnetii isolates. The data indicate that the phylogenetic placement of C. burnetii based on this 946-bp variable region is consistent with the traditional classification based on 16S rDNA sequence data. This report is the first detailed analysis of the distribution of C. burnetii in the white-tailed deer in a particular region of the United States. Results of this study suggest that deer-associated C. burnetii is widespread throughout Maryland and that C. burnetii has been enzootic in white-tailed deer for at least 25 years.Goro Goro or GORO may refer to: Goro (name) GORO, Korean name for the Russian R-37 missile Goro, a variant of Elia (magic trick) Goro (mountain), one of the Seven Summits of Hong Kong Goro, an anime franchise, created by Masamune Shirow, made by Studio Pierrot Goro (Goro no Hatchōtachi), the main character in the anime series.
